DLUO 30/11/2022	Techn. file --	Picked up/received on	02/03/2020
DPAO 8 M	Specif. date --	Start of analysis	05/03/2020
EMB ERKUL KOZMETIK	Client purchase order no. --	End of analysis	31/03/2020

Object of the revision This report has been modified because of conclusion changing.

Conclusion According to the analysis results, parabens are not detected.

According to the analysis results: lead is detected in this sample.

Lead is present in the annexe II of the Regulation (CE) 1223/2009 of the european parliament on cosmetic products: Lead is strictly forbidden in cosmetic products. Based on the assumption that the substance comes from impurities of used raw material, or comes from the manufacturing process, it could be worth to prove that the presence of this substance in the product is technically unavoidable.

APPENDIXES:

Analytical report

The results and observations of this test report only concern the sample provided to the laboratory and tested. Except specific case, the sample will be kept during the duration mentioned in the contract or by default in our terms and conditions from the date indicated on the present document. The sample and the information regarding the sample have been provided by the client. All information related to the sample are under liability of the client and have not been checked by the Eurofins company. This test report is not aimed to give an exhaustive conformity to regulations. It only refers to qualitative and quantitative criteria which allow declaring the compliance to specifications of the reference file when provided by the customer. The result (excluding microbiological analyses) is declared not compliant when, in spite of taking into account the measurement uncertainty at a 95 % trust level (if available), the value found cannot be included in the specification interval and/or be inferior to the regulatory limit. The copy of this report is only authorized by unabridged edition. Any publication of this report must be authorised by Eurofins.
