Conclusion Parabens measurement uncertainty equals to 40%.
 Lead and arsenic measurement uncertainty equals to 30%.

According to the results, methyl paraben is present in this sample.
 This molecule is present in the annexe V of the Regulation (CE) 1223/2009 of the european parliament on cosmetic products:
 Maximum concentration in ready for use preparation, for methylparaben and ethylparaben: 0,4 % for single ester and 0,8 % for mixtures of esters.

According to the result, this product is conform with the regulation (CE) N°1223/2009. However, these components should be present on the product label.

APPENDIXES:
Analytical report

The results and observations of this test report only concern the sample provided to the laboratory and tested. Except specific case, the sample will be kept during the duration mentioned in the contract or by default in our terms and conditions from the date indicated on the present document. The sample and the information regarding the sample have been provided by the client. All information related to the sample are under liability of the client and have not been checked by the Eurofins company. This test report is not aimed to give an exhaustive conformity to regulations. It only refers to qualitative and quantitative criteria which allow declaring the compliance to specifications of the reference file when provided by the customer. The result (excluding microbiological analyses) is declared not compliant when, in spite of taking into account the measurement uncertainty at a 95 % trust level (if available), the value found cannot be included in the specification interval and/or be inferior to the regulatory limit. The copy of this report is only authorized by unabridged edition. Any publication of this report must be authorised by Eurofins.
